

# Marie Tharp Lecture Series for Ocean Research

The Marie Tharp Lecture Series for Ocean Research aims at presenting and honoring high-profile female scientists in marine sciences as role models for young scientists. In combination with a public lecture, there will be a get-together exclusively for women to discuss career paths and exchange experiences.

## Invited Speakers 2018

**22<sup>nd</sup> March 2018**

**Prof. Dr. Bärbel Hönisch**

Lamont-Doherty Earth Observatory of Columbia University, USA

*Reconstructing marine carbonate chemistry in Earth history*

**24<sup>th</sup> May 2018**

**Prof. Dr. Anya Waite**

Alfred-Wegener-Institut, Germany

*Polar nitrogen budgets - new nitrogen and regional dynamics*

**6<sup>th</sup> July 2018**

**Prof. Dr. Lisa Beal**

University of Miami, USA

*Western Boundary Currents in a changing climate: A case study of the Agulhas Current*

**25<sup>th</sup> September 2018**

**Prof. Dr. Hildegard Westphal**

University of Bremen, Germany

*Tropical coastlines - crossing the divide*

**21<sup>st</sup> November 2018**

**Prof. Dr. Katja Fennel**

Dalhousie University, Canada

*Biogeochemical trends and their ecosystem impacts in Atlantic Canada*

Location: GEOMAR Lecture Hall West Shore
