

Marie-Tharp Lecture Series for Ocean Research

The Marie-Tharp Lecture Series for Ocean Research aims at presenting and honoring high-profile female scientists in marine sciences as role models for young scientists. In combination with a public lecture, there will be a get-together exclusively for women to discuss career paths and exchange experiences.

Invited Speakers 2017

20th February 2017

Prof. Dr. Terry Plank

Lamont-Doherty Earth Observatory, Columbia University, USA

Volatiles and Volcanic Vigor

GEOMAR Lecture Hall East Shore

Joint lecture with "The Geological Society of America (GSA) James B. Thompson, Jr. Distinguished International Lecture"

22nd May 2017

Prof. Dr. Donna Blackman

Scripps Institution of Oceanography, UC San Diego, USA
