

# ISOS PANEL DISCUSSION

## Research Impact

## How to Evaluate the Impact of Research on Society?

9 February 2016 | 16:00 - 18:00 h

This event is open to all interested participants!

**The interaction between society and science is defined by an increasing demand for dialogue and accountability.**

**Outreach to and impact on society have thus become important challenges in science – for individual scientists as much as for institutions and funding bodies.**

**To evaluate the actual impact of academic research on society, concrete measures are needed, yet remain highly debated.**

### Panelists:

**Inspirational talk: Dr. Dagmar Simon**, Berlin Social Science Center (WZB)  
Expert for science policy studies and evaluation research; invited expert for the Committee on Education, Research and Technology Assessment, German Bundestag

**Prof. Dr. Isabella Peters**, German National Library of Economics (ZBW) and CAU  
Expert for web science, altmetrics and knowledge representation

**Prof. Dr. Martin Quaas**, CAU  
Expert for environmental, resource and ecological economics

**Prof. Dr. Martin Visbeck**, GEOMAR and CAU  
Physical oceanographer and speaker of the Cluster of Excellence „The Future Ocean“

Moderated by **Siren Rühls**, GEOMAR, ISOS PhD candidate

**Venue:** GEOMAR westshore building, Düsternbrooker Weg 20, lecture hall
